

“I'm able to get players walking and jogging on the Orbiter who can barely limp on a regular surface due to the pain.”

Ray Melchiorre
Head Trainer - Houston Rockets

**cushion shock • incomparable • results • run again
optimum care • minimize pain • for all ages • safe
feel good again • balance • comfort + stability**

“I ran on the Orbiter for over three hours, at a 9 minute pace, and experienced no joint pain in the succeeding 48 hours. After such a run on a conventional surface, I would be wiped out for the next couple of days.”

R.E. Hoekman, M.D.
Orthopedic Surgeon and Marathon Runner - Houston, Texas

**exercise without irritation • natural • proven benefits
advance • legs & back • control • take pressure off
increase enthusiasm • approved • optimum condition**

“As I get a little older in my career, I don't want to train on hard surfaces as much. Orbiter takes the pressure off my joints and legs. There's no question the Orbiter allowed me to start my running program earlier and helped me get back faster after I had my knee scoped a few years ago.”

Five Time NFL All-Pro QB Warren Moon
1991 NFL “Man Of The Year”

**makes sense • unlock potential • provide the best
discover youth • fun • real running • unmatched
optimum performance • returns energy • run faster**

“I am very impressed with the Orbiter shock absorbing treadmill. After performing extensive comparison research and having used it in my practice, I have come to the conclusion that the Orbiter's suspended surface puts it above and beyond all other treadmills.”

Richard Steadman, M.D.
Orthopedic Surgeon - Vail, Colorado
